- GitHub
- Postman

PROFILE

Professional Web Developer with 1.5 years of experience, specializing in Angular 16, with working knowledge of ASP.NET Core 8 and SQL Server. Experienced in designing, developing, and deploying high-performance, scalable web applications. Primarily focused on front-end development using Angular, with hands-on experience in backend integration and database operations. Skilled in Angular for front-end development, ASP.NET Core for backend services, and databases such as SQL Server and PostgreSQL. Proficient in GitHub version control and modern development tools, following best practices to build robust, maintainable, and efficient applications.

WORK EXPERIENCE

PERSISTENT SOLUTIONS   2024 - PRESENT

- Junior Frontend Developer (July 2024 – Present) At Persistent Solutions, I've gained valuable experience working across multiple business domains and projects, including:
- These are websites developed by me and my team members :
- **https://persistentsolutions.co/Home**
- **https://www.persistentsolutions.com.au/Home**

Key Responsibilities:

- Developed and maintained dynamic web applications using Angular 16 for front-end development.
- Integrated front-end applications with RESTful APIs and worked with ASP.NET Core 8 at a basic level
- Gained hands-on experience with SQL queries, including running INSERT/UPDATE commands, reviewing stored procedures, and analyzing project functions for better understanding.
